### In the News

#### Underwater Grasses in the Bay Improve Despite Record Rain (*The Virginian Pilot*)

Last year's record rainfall throughout the Chesapeake Bay makes hard numbers hard to come by, but experts believe underwater grasses withstood the "onslaught" and even improved a bit.

If they're right, it means that seagrass acreage swelled by 4%, from nearly 105,000 acres in 2017 to 108,960 in 2018 - the highest recorded level to date.

#### Chesapeake Bay blue crabs are booming this year- so why are they still so expensive? (*The Washington Post*)

Chesapeake Bay crabs have been so plentiful this year - a 60 percent increase over last year, according to an annual population survey - that locals such as Maryland Gov. Larry Hogan (R) have cheered the bumper crop as a sign of good stewardship for the bay and its fisheries. And yet market prices for blue crabs seemed barely to move at all.

Around the Fourth of July - when crabpicking reaches its peak - prices for premium male crabs known as jimmies were about as high or higher than they were last year, at \$325 and up for a bushel.

### Upcoming Events

#### American River Restoration Chickahominy River Clean Up (August 17, 2019)

Non-profit American River Restoration is looking for 20 strong, able bodied volunteers who are comfortable in water for a Chickahominy River clean up event. If you are passionate about eliminating plastic pollution, you have a kayak, or you know your way around a river, we would love to hear from you. Call 804-441-5257 or email [hprendergast@arrva.org](mailto:hprendergast@arrva.org) for more information.

Date: August 17th  
Time: Morning, TBD

Food will be provided and participation in the event is eligible to go towards any required community service hours.

**Richmond CBLP Level 1 Training**  
(September 10-11, 2019)

The Chesapeake Bay Landscape Professional (CBLP) Certification is a voluntary, regional credential for professionals who design, install, and maintain sustainable landscapes and green infrastructure practices in the Bay watershed. We now have over 400 Level 1 certified CBLPs in our network within the Chesapeake Bay Region, with approximately 160 in Virginia. Level 1 is our baseline credential emphasizing proper management of green infrastructure practices; while Level 2 is design and installation credential focused on advanced green infrastructure concepts and practices. Candidates can attend trainings and take exams anywhere they are offered. Level 1 CBLPs with green infrastructure experience are qualified to apply for Level 2 certification.

Level 1 consists of one two-day class that combines classroom learning about conservation landscaping (native plants, natural communities, habitat, soils, Invasives management) and stormwater BMPs, with a field-based maintenance practicum. The class also covers BMP inspection and verification protocols. Level 1 candidates are required to study independently and pass a written examination at a later date.

Who should get certified? Level 1 candidates must have a degree, certificate, or certification in a related green infrastructure field, or have professional experience. Attending a CBLP Level 1 training provides continuing education and professional development for several existing certifications including: certified horticulturalists, arborists, urban nutrient managers, DEQ SWM and ESC inspectors/planners, certified designers (APLD, VSLD).

We offer discounts to organizations that host trainings or send 3 or more staff to a training. For more information, visit <http://cblpro.org> or contact: Beth Ginter, CBLP Coordinator, [beth@cblpro.org](mailto:beth@cblpro.org).

Visit <http://cblpro.org/get-certified/> for information, and to apply for certification.

## River Management Training Symposium (May 12-15, 2020)

Presented by The River Management Society. in partnership with Virginia Department of Conservation and Recreation and Virginia Commonwealth University. Commemorating the 50th Anniversary of Virginia's Scenic Rivers Program.

The Virginia Commonwealth University River Studies and Leadership Certificate program is proud to be co-hosting with the River Management Society and Virginia Department of Conservation and Recreation the [biennial RMS training symposium](#) against the backdrop of the 50th anniversary of Virginia's Scenic Rivers Program. Join your colleagues in river management training, best practice presentations, posters, information-packed field workshops and fascinating evening programs. The meeting will be held at the VCU Monroe campus. We invite you to submit your 2020 River Management Training Symposium: From Mountain Creeks to Metro Canals abstract by COB Monday, September 9, 2019. We welcome presentations and panels from river management professionals (e.g., managers, planners, academics, consultants, or students) that show how you, your organization, and/or the profession are protecting or enhancing river values. Come help us learn about innovations, creative approaches, successes, and visions for the future of sustainable river management!

Our objectives for this symposium are to:

1. Share current and cutting-edge research in the disciplines of river ecology, watershed science, recreation planning.
2. Connect river managers across geographic regions.
3. Spark interdisciplinary conversations.
4. Provide opportunities for attendees to sharpen skills, share accomplishments, investigate questions and build new alliances

We are seeking proposals that fit within one or more of these program broad thematic areas: 1. Mountain and Rural Rivers (Management Issues and Science): Applied research and management practice in applying ecological, biological, geomorphologic or social frameworks to river management especially in headwater areas. 2. Urban Rivers (Urban Renewal, Infrastructure, Issues and Economics): How rivers contribute to a community's identity and economic well-being. 3. Management Technology Tools: New technologies and how they are being used in transforming river management. 4. Policy and Practice (State and Federal River Management Legislation, Policies and Systems): The next river protection initiative - will it come from cities or states? Emerging policy or legislation that impacts how rivers are managed. 5. Partnerships and Community Building: Initiatives and successful models that join river management agencies, scientists, universities, advocacy groups and/or communities to support river projects and protection. 6. Water and River Corridor Trails: The relationship of trails to river management, resource protection, recreational use, and public support.

Call for Presentations

Propose a training workshop or presentation as a solo presenter or group or poster [HERE](#).
